1/37

This lecture will be recorded

From lecture slips & recitation sections.

When is the final?

From lecture slips & recitation sections.

• When is the final?

December, 14, 9am-11am, on Gradescope.

From lecture slips & recitation sections.

- When is the final?

 December, 14, 9am-11am, on Gradescope.
- What is the format?

From lecture slips & recitation sections.

- When is the final?

 December, 14, 9am-11am, on Gradescope.
- What is the format?
 Content will be similar to past paper exams. Format will be similar to Lab Quizzes on Gradescope: multiple choice, select all, short answer, fill in the blank. Pay extra attention to question instructions

From lecture slips & recitation sections.

- When is the final?

 December, 14, 9am-11am, on Gradescope.
- What is the format?
 Content will be similar to past paper exams. Format will be similar to Lab Quizzes
 on Gradescope: multiple choice, select all, short answer, fill in the blank. Pay
 extra attention to question instructions
- Ihave another final then. What do I do?

- Design Patterns: Max (Min)
- Design Challenge

Today's Topics

- Recap: Folium
- Indefinite loops
- Design Patterns: Max (Min)
- Design Challenge

Challenge:

What does this code do?

```
import folium
import pandas as pd
cuny = pd.read_csv('cunyLocations.csv')
mapCUNY = folium.Map(location=[40.75, -74.125])
for index,row in cuny.iterrows():
    lat = row["Latitude"]
    lon = row["Longitude"]
    name = row["Campus"]
    if row["College or Institution Type"] == "Senior Colleges":
         collegeIcon = folium.Icon(color="purple")
    else:
         collegeIcon = folium.Icon(color="blue")
    newMarker = folium.Marker([lat, lon], popup=name, icon=collegeIcon)
    newMarker.add_to(mapCUNY)
mapCUNY.save(outfile='cunyLocationsSenior.html')
```

Folium example

What does this code do?

```
import folium
import pandas as pd

cuny = pd.read_csv('cunyLocations.csv')
mapCUNY = folium.Map(location=[40.75, -74.125])

for index,row in cuny.iterrows():
    lat = row["Latitude"]
    lon = row["Cargitude"]
    name = row["Campus"]
    if row["College or Institution Type"] == "Senior Colleges":
        collegeIcon = folium.Icon(color="purple")
    else:
        collegeIcon = folium.Icon(color="blue")
    newMarker = folium.Marker([lat, lon], popup=name, icon=collegeIcon)
    newMarker.add_to(mapCUNY)

mapCUNY.save(outfile='cunyLocationsSenior.html')
```

9/37

Today's Topics

- Recap: Folium
- Indefinite loops
- Design Patterns: Max (Min)
- Design Challenge

Challenge:

 Write a function that asks a user for number after 2000 but before 2018. The function should repeatedly ask the user for a number until they enter one within the range and return the number.

Coding

• Write a function that asks a user for number after 2000 but before 2018. The function should repeatedly ask the user for a number until they enter one within the range and return the number..

Coding

• Write a function that asks a user for number after 2000 but before 2018. The function should repeatedly ask the user for a number until they enter one within the range and return the number.

def getYear():

• Write a function that asks a user for number after 2000 but before 2018. The function should repeatedly ask the user for a number until they enter one within the range and return the number.

```
def getYear():
```

```
return(num)
```

CSci 127 (Hunter) Lecture 10 10 November 2020 15 / 37

• Write a function that asks a user for number after 2000 but before 2018. The function should repeatedly ask the user for a number until they enter one within the range and return the number.

```
num = 0
return(num)
```

def getYear():

16 / 37

 Write a function that asks a user for number after 2000 but before 2018. The function should repeatedly ask the user for a number until they enter one within the range and return the number.

```
def getYear():
   num = 0
   while num <= 2000 or num >= 2018:
   return(num)
```

 Write a function that asks a user for number after 2000 but before 2018. The function should repeatedly ask the user for a number until they enter one within the range and return the number.

```
def getYear():
   num = 0
   while num <= 2000 or num >= 2018:
        num = int(input('Enter a number > 2000 & < 2018'))
   return(num)</pre>
```

```
#Spring 2012 Final Exam, #8

nums = [1,4,0,6,5,2,9,8,12]
print(rums)
i=0
while i < len(nums)-1:
    if nums[i] < nums[i+1] = nums[i+1], nums[i]
    i=1
print(rums)
```

CSci 127 (Hunter) Lecture 10 10 November 2020 19 / 37

 Indefinite loops repeat as long as the condition is true.

```
#Spring 2012 Final Exam, #8
nums = [1,4,6,6,5,2,9,8,12]
print(nums)
i=0
while i < len(nums)-1:
    if nums[i] < nums[i+1] = nums[i+1], nums[i]
    i=1
    print(nums)</pre>
```

19 / 37

- Indefinite loops repeat as long as the condition is true.
- Could execute the body of the loop zero times, 10 times, infinite number of times.

- Indefinite loops repeat as long as the condition is true.
- Could execute the body of the loop zero times, 10 times, infinite number of times.
- The condition determines how many times.

- Indefinite loops repeat as long as the condition is true.
- Could execute the body of the loop zero times, 10 times, infinite number of times.
- The condition determines how many times.
- Very useful for checking input, simulations, and games.

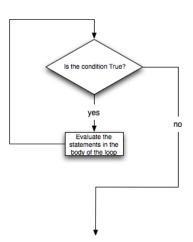

```
#Spring 2012 Final Exom, #8

nums = [1,4,8,6,5,2,9,8,12]
print(nums)
i=0
while i < len(nums)-1:
    if nums[i] < nums[i+1]:
        i=i+1
print(nums)
print(nums)
```

CSci 127 (Hunter) Lecture 10 10 November 2020 20 / 37

```
#Spring 2012 Final Exam, #8

nums = [1,4,8,6,5,2,9,8,12]
print(nums)
i=0
while i < len(nums)-1:
    if nums[i] < nums[i+1]:
    nums[i], nums[i+1] < nums[i+1], nums[i]
print(nums)
```

Challenge

Predict what this code does:

```
#Random search
import turtle
import random
tess = turtle.Turtle()
tess.color('steelBlue')
tess.shape('turtle')
tess.penup()
#Start off screen:
tess.goto(-250,-250)
#Remember: abs(x) < 25 means absolute value: -25 < x < 25
while abs(tess.xcor()) > 25 or abs(tess.ycor()) > 25:
  x = random.randrange(-200,200)
  y = random.randrange(-200,200)
  tess.goto(x,y)
  tess.stamp()
  print(tess.xcor(), tess.ycor())
print('Found the center!')
```

Trinket Demo

```
#Random search
import turtle
import random
tess = turtle.Turtle()
tess.color('steelBlue')
tess.shape('turtle')
tess.penup()
#Start off screen:
tess.goto(-250,-250)
#Remember: abs(x) < 25 means absolute value: -25 < x < 25
while abs(tess.xcor()) > 25 or abs(tess.ycor()) > 25:
  x = random.randrange(-200,200)
  y = random.randrange(-200,200)
  tess.goto(x,y)
  tess.stamp()
  print(tess.xcor(), tess.ycor())
print('Found the center!')
```

(Demo with trinket)

22 / 37

Today's Topics

- Recap: Folium
- Indefinite loops
- Design Patterns: Max (Min)
- Design Challenge

Design Patterns

 A design pattern is a standard algorithm or approach for solving a common problem.

Design Patterns

- A design pattern is a standard algorithm or approach for solving a common problem.
- The pattern is independent of the programming language.

Design Patterns

- A design pattern is a standard algorithm or approach for solving a common problem.
- The pattern is independent of the programming language.
- Can think of as a master recipe, with variations for different situations.

Challenge:

Predict what the code will do:

```
nums = [1,4,10,6,5,42,9,8,12]
maxNum = 0
for n in nums:
    if n > maxNum:
        maxNum = n
print('The max is', maxNum)
```

CSci 127 (Hunter) Lecture 10 10 November 2020 25 / 37

Python Tutor

```
nums = [1,4,10,6,5,42,9,8,12]
maxNum = 0
for n in nums:
    if n > maxNum:
        maxNum = n
print('The max is', maxNum)
(Demo with pythonTutor)
```

Set a variable to the smallest value.

```
nums = [1,4,10,6,5,42,9,8,12]
maxNum = 0
for n in nums:
    if n > maxNum:
        maxNum = n
print('The max is', maxNum)
```

CSci 127 (Hunter) Lecture 10 10 November 2020 27 / 37

```
nums = [1,4,10,6,5,42,9,8,12]
maxNum = 0
for n in nums:
    if n > maxNum:
        maxNum = n
print('The max is', maxNum)
```

- Set a variable to the smallest value.
- Loop through the list,

```
nums = [1,4,10,6,5,42,9,8,12]
maxNum = 0
for n in nums:
    if n > maxNum:
        maxNum = n
print('The max is', maxNum)
```

- Set a variable to the smallest value.
- Loop through the list,
 - If the current number is larger, update your variable.

CSci 127 (Hunter) Lecture 10 10 November 2020 27 / 37

- Set a variable to the smallest value.
- Loop through the list,
- If the current number is larger, update your variable.
- Print/return the largest number found.

```
nums = [1,4,10,6,5,42,9,8,12]
maxNum = 0
for n in nums:
    if n > maxNum:
        maxNum = n
print('The max is', maxNum)
```

- Set a variable to the smallest value.
- Loop through the list,
- If the current number is larger, update your variable.
- Print/return the largest number found.
- Similar idea works for finding the minimum value.

Pandas: Minimum Values

• In Pandas, lovely built-in functions:

CSci 127 (Hunter) Lecture 10 10 November 2020 28 / 37

Pandas: Minimum Values

$\mathsf{pandas}_{y_{it} = \beta' x_{it} + \mu_i + \epsilon_{it}} \quad \mathsf{I}_{\mathsf{l}}$

- In Pandas, lovely built-in functions:
 - ▶ df.sort_values('First Name') and
 - ▶ df['First Name'].min()

28 / 37

Pandas: Minimum Values

xkcd #1508

• Since you must pass the final exam to pass the course, we end every lecture with final exam review.

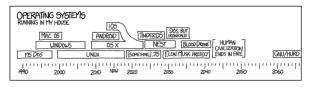

36 / 37

CSci 127 (Hunter) Lecture 10 10 November 2020

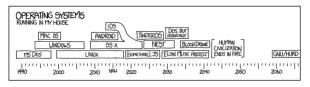

xkcd #1508

- Since you must pass the final exam to pass the course, we end every lecture with final exam review.
- Pull out something to write on (not to be turned in).
- Lightning rounds:
 - write as much you can for 60 seconds;
 - ▶ followed by answer; and
 - ► repeat.

xkcd #1508

- Since you must pass the final exam to pass the course, we end every lecture with final exam review.
- Pull out something to write on (not to be turned in).
- Lightning rounds:
 - write as much you can for 60 seconds;
 - followed by answer; and
 - ► repeat.
- Past exams are on the webpage (under Final Exam Information).

xkcd #1508

- Since you must pass the final exam to pass the course, we end every lecture with final exam review.
- Pull out something to write on (not to be turned in).
- Lightning rounds:
 - write as much you can for 60 seconds;
 - followed by answer; and
 - ► repeat.
- Past exams are on the webpage (under Final Exam Information).
- Theme: Unix commands! (Spring 19 Version 3, #1.b)

Before next lecture, don't forget to:

Work on this week's Online Lab

Before next lecture, don't forget to:

- Work on this week's Online Lab
- Optional attend live Lab Review on Wednesday 1-2:30pm

Before next lecture, don't forget to:

- Work on this week's Online Lab
- Optional attend live Lab Review on Wednesday 1-2:30pm
- Take the Lab Quiz on Gradescope by 6pm on Wednesday

Before next lecture, don't forget to:

- Work on this week's Online Lab
- Optional attend live Lab Review on Wednesday 1-2:30pm
- Take the Lab Quiz on Gradescope by 6pm on Wednesday
- Submit this week's 5 programming assignments (programs 46-50)

Before next lecture, don't forget to:

- Work on this week's Online Lab
- Optional attend live Lab Review on Wednesday 1-2:30pm
- Take the Lab Quiz on Gradescope by 6pm on Wednesday
- Submit this week's 5 programming assignments (programs 46-50)
- At any point, visit our Drop-In Tutoring 11am-5pm for help!!!
